

**GOT SURPLUS INVENTORY
FLAUNT IT!**

Materials Management Services

Summus Industries total manage solution includes improving processes and technology to manage surplus inventory. We offer a total manage solution as a comprehensive program through our Materials Management Services Division and our Surplus Inventory Management System (SIMS) software solution.

To optimize surplus inventory control, leading companies have systematic visibility to their surplus inventory. This visibility provides a competitive edge with abilities to plan procurement needs effectively, reduce the need to purchase new items, and minimize errors associated with manual reconciliation.

Why Have Visibility To Your Surplus Inventory?

The three key benefits of knowing what is in your surplus inventory are:

- Optimizing surplus inventory to reduce unnecessary spend on new products
- Providing surplus inventory visibility to your company and supply chain partners
- Accurately report surplus inventory assets

The Benefits Of Summus Industries Surplus Inventory Management System Includes:

- Viewing surplus inventory condition, quantity, and image
- Ordering or requesting items from inventory
- Easily converting surplus components into recovered value
- Retaining inventory control
